To : Chief, [REDACTED]

19 JUNE 1953

25X1

From : Senior Representative [REDACTED] INFO: Chief, FE

Subject : General - Administrative
Specific - Communications Supplies forwarded
under Dispatch Pouch, dated 26 May
1953

REF:

1. In reference to the shipment of 12 adaptors forwarded by your office under cover of the reference dispatch, these items are not what was required.
2. Our request was for adaptors which were equivalent to those made by G. D. Wood Electric, New York, under catalog No. 2104 which are Male American Bayonet on one side and Female European Round on the other.
3. Those supplied by your office were exactly the reverse.
4. To assist in clarifying our requirement, the intended use of these plugs is to permit the use of RS-1 units on RE-214-(*) generators, and where ever else power must be taken from equipment fitted with American Female outlets.
5. In the absence of instructions to the contrary this station will retain the adaptors already sent as they can be used for other purposes around the station.
